

Pharmacy updates

1. CVS is offering free home delivery for prescription and non-prescription medication. Orders are available for 1-2 days delivery after the prescription has been filled.
2. Walgreens, like CVS, is offering free home delivery for prescription and non-prescription medication and has also added drive-thru shopping. Customers may now come to the drive thru window and request a menu containing items from the following categories-
 - Cleaning supplies and sanitizers
 - Cough/cold, pain/fever and immunity support
 - Grocery items
 - Infant formula/adult nutrition
 - Medical supplies/first aid
 - Paper goods

After making the selections on the menu, a Walgreens employee will gather the items, eliminating the need for customers to exit their vehicle and enter the store.
